

## PRESS RELEASE

---

### Saint-Gobain Weber Starts Selling Marine Boards

**As of 1st September, Saint-Gobain Weber will begin as the exclusive reseller of Grupo Garnica's marine plywood range. The fire retardant plywoods and hygienic lining-boards will make a natural addition to the Weber Marine & Offshore product range of flooring systems.**

The Marine range from Grupo Garnica Plywood S.A. was developed by Garnica and enhanced by former reseller, Optimera – another Saint-Gobain subsidiary. Weber continues this partnership with Garnica as the producer's technical competence and Weber's market knowledge goes hand in hand.

For the marine market, Weber and Garnica now cooperate on Fireshield® fire retardant plywoods for raised floors, furniture boards and the new Duraply® Marine hygienic wall-linings for fishing vessels.

Weber is fully owned subsidiary of the Saint-Gobain corporation, which counts 170,000 employees in 65 countries, with a turnover that exceeds 40bn euro. Saint-Gobain produces glass, insulation, mortar & screed, gypsum, ceramic fibers, adhesives and also have a large division of building distribution companies.
